### **DETAILED ACTION**

1. This action is in response to the amendment filed on 11/15/2007.
2. Claim 1 has been amended.
3. Claims 1-13 are pending for consideration.

### ***Response to Arguments***

4. Applicant's arguments, filed 11/15/2007, with respect to claims 1-13 have been fully considered and are persuasive. The nonstatutory double patenting rejection of 05/15/2007 has been withdrawn.

### ***Allowable Subject Matter***

5. Claims 1-13 are allowed.
6. The following is an examiner's statement of reasons for allowance: Applicant claims implementing a quantum cryptography system encoding bit values on approximations of elementary quantum systems with provable and absolute security against proton number splitting attacks. The closest prior art, Huttner et al, teaches a quantum key distribution system which comprises the "Four-States Protocol", "Two-States Protocol" and the new class of protocols combining the advantages of the previous ones. However, Huttner et al does not teach the emitter encode each it at random onto a pair of non-orthogonal states belonging to at least two suitable sets, there is not a single quantum operation reducing the overlap of quantum states of all sets simultaneously, the receiver randomly chooses an analysis measurement within

said suitable sets, the receiver discards all received encoded bits for which it has chosen a different analysis measurement incompatible with the set they belonged to and sends an appropriate information to the emitter along the conventional communication channel.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
